KPR EXPANDS ITS FABRIC PROCESSING CAPACITY AND SOLAR POWER GENERATION CAPACITY

KPR expands its Fabric processing capacity and strengthens its solar power generation capacity.

Consequent on the increased Garment production capacity, the demand for processing is going up. To meet with the same, we are planning to increase the processing capacity from 25,000 MT to 37,000 MT per annum at a capital outlay of Rs.250 Crores. It is expected that the expansion will be completed within one year.

Besides, it is also proposed to modernize the existing processing facility at an investment of Rs.50 Crores so as to upgrade the facility.

Currently, KPR has Rooftop Solar power generation capacity of 12 MW. In order to strengthen our renewable power resource, it is proposed to establish an additional solar power generation of 25 MW at an investment of Rs.100 Crores. This will enhance our solar power generation capacity to 37 MW. With this expansion the Company will reach its green power capacity to 100 MW, which includes wind and solar power, meeting substantial portion of its power requirement.

The above capital outlay will be met with our internal accruals.
